10 LIFE-CHANGING HEALTH INNOVATIONS

Sew Cool

For Judy Ross, it all started in 1989 while she was living on a houseboat in India, working with master embroiderers to create a line of hand-stitched wool scarves. When she returned to the U.S., Judy used her newly discovered passion to jumpstart her namesake home textile company. It now caters to luxe clients like The Ritz-Carlton, Four Seasons and Barneys New York. Her latest project is a collaboration with Garnet Hill—pillow covers, bedding, rugs and towels that all play up her signature contemporary style.

Judy's Interior Inspo

1 Your foyer—or any vestibule or nook—is a spot that's often overlooked. Make a statement with patterned wallpaper, which creates energy and adds texture.

2 For painting an entire space, I've become a big fan of Benjamin Moore White Dove, a soft neutral that packs a clean punch. Then I go all in with colorful accessories.

3 I love to collect books and organize them by color. It adds a visual story to any room.

4 Ottomans pull double duty in a living room as extra seating or splashy end tables. I created this Fauna pattern as a botanical design with simple lines and a modern feel. Judy Ross Textiles Fauna Ottoman, garnethill.com, \$198

5 UpriseArt.com is my favorite spot to snag affordable paintings and photographs—some starting at \$80—from up-and-coming artists.

6 When I'm ready for change, the first thing I do is swap out my rugs. This one simple move brings a whole new energy into an area.
